# Foreword

Working together, Forest Fire Management Victoria (FFMVic\*) and the Country Fire Authority (CFA) have developed this Joint Fuel Management Program (JFMP) which covers the Gippsland FFMVic Region and South East CFA Region. It demonstrates our commitment to working more closely together to deliver the best bushfire risk reduction outcomes for Victorians.

The Joint Fuel Management Program is planned to achieve an integrated and risk-focused fuel management program across public and private land. It is designed to implement long-term bushfire management strategies that outline how the risk of bushfires is managed for the protection of life and property on public and private land, while maintaining and improving natural ecosystems.

In response to the devastating 2019/20 Black Summer bushfires and subsequent inquiries, the Victorian Government has committed to new programs which complement our current fuel management program and aim to reduce bushfire risk across all land tenure.

Investment will be made on fuel management, targeting long grass and other flammable undergrowth, particularly along our major road and rail corridors. We will work together with Local Government Authorities and water, road and rail authorities to ensure that our works are complementary.

We have worked with Traditional Owners in preparing the following program and we value their input into planned burns and other fuel treatment works. FFMVic and CFA continue to support Traditional Owners to return cultural fire to their Country.

The program has also been shaped by a variety of research and local information, such as specialist input from FFMVic, CFA staff and volunteers and key industries, as well as knowledge from local communities, including Traditional Owners and key stakeholders. We would like to recognise the work that has been put into developing this Joint Fuel Management Program, by FFMVic, CFA and the local communities.

We encourage your continued input to ensure our plans protect those assets and values which are important to all Victorians

Sam Quigley

Deputy Chief Officer  
CFA South East Region

\* Forest Fire Management Victoria (FFMVic) – is the organisation that delivers services to achieve DELWP's legislated responsibilities. It consists of specialist staff from DELWP, Parks Victoria, Melbourne Water and VicForests.

## About the program

The JFMP encompasses fuel management activities planned to be delivered by CFA and FFMVic across the coming three years in the Gippsland FFMVic Region and South East CFA Region (Map 1)

Each activity is led by either CFA or FFMVic but is delivered with the support of both agencies and other partners including Department of Transport, EMV, Traditional Owners and local businesses.

This document contains details about the following planned activities:

**Planned Burns** - fuel reduction, ecological and other planned burns by indicative year for the three-year period.

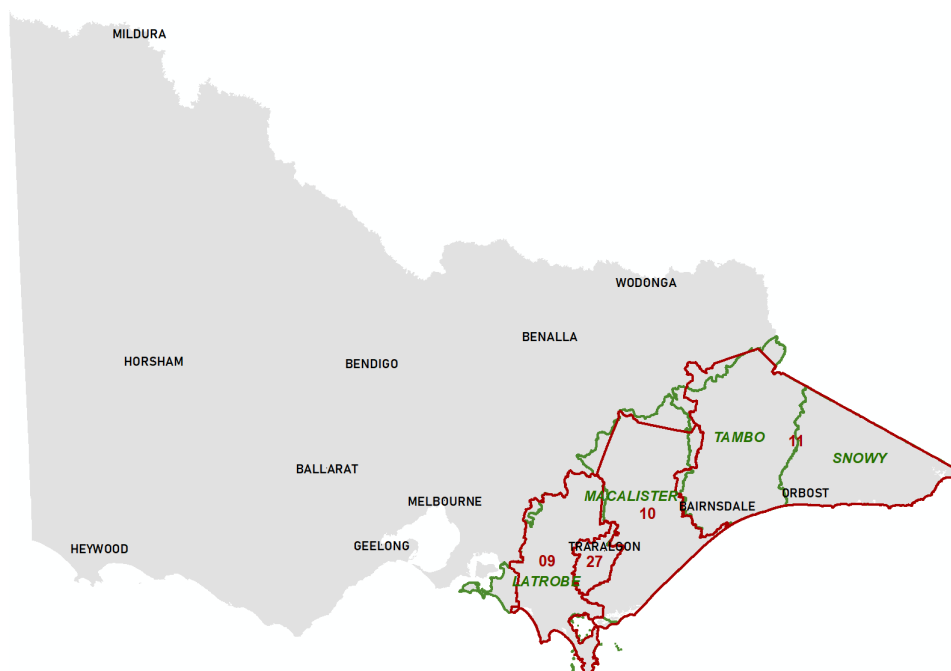

**Non-Burning Fuel Treatments** - the program of works that uses methods other than burning to achieve fuel management objectives.

**Strategic Fuel Breaks** - a strip of land where vegetation has been modified to reduce the rate of spread and intensity of fire for the direct protection of assets and/or assist fire control. They can also assist in the safe delivery of planned burns.

**Cultural burning** – planned burns led by Traditional Owners on their Country and the use of cultural fire as a land management practice by Traditional Owners.

It is important to note that the ability to carry out planned activities is dependent on seasonal and local weather conditions. To allow for this, planned burns from the second and third years of the program may be brought forward to the current year to replace a burn planned for the first year.

### Map 1: FFMVic and CFA Districts included on this Joint Fuel Management Program

The JFMP is prepared and will be implemented in accordance with Safer Together: A new approach to reducing the risk of bushfire in Victoria, the Code of Practice for Bushfire Management on Public Land 2012 the Regional Bushfire Management Strategy and relevant CFA and FFMVic Instructions, Manuals and Guidelines.

Burns on public land associated with timber harvesting regeneration as well as small heap burns are not included in the JFMP as they are approved as part of separate planning processes.

# Our Objectives

This JFMP has been developed to implement strategies set out in the Gippsland Bushfire Management Strategy 2020 (BMS), which has been developed by FFMVic and CFA in consultation with agencies, stakeholders and the community.

The BMS has replaced the Alpine and Greater Gippsland Strategic Bushfire Management Plan and part of the East Central SBMP, within Latrobe District. Latrobe District was part of the East Central Bushfire Risk Landscape (old strategic planning footprint) but is now a part of the Gippsland Region (new strategic planning footprint).

The BMS establishes a cross-tenure fuel management strategy to address the bushfire risk across public and private land. It:

- sets clear objectives and associated performance measures for fire management at a regional scale;
- identifies where important values and assets are located across the landscape; and
- includes regional trends in population, industry, and environmental change.

The BMS defines

- fire management zones on public land that focus appropriate fire management activities to reduce bushfire risk for identified values and promote ecological resilience over the life of the strategy (30-40 years).
- Bushfire Risk Engagement Areas (BREA) across public and private land. These areas are intended to support agencies to engage with private landholders about fuel management where it will provide effective bushfire risk reduction.

**You can explore your local Bushfire Management Strategy [here](#).**

## Residual Risk

The Gippsland BMS contributes to achieving the Victorian Government statewide risk reduction objective of maintaining bushfire risk at or below a residual risk of 70% in the long-term.

Residual risk is the risk, on average, that bushfires will impact on life and property across the landscape. It is expressed as the percentage of the risk that remains after bushfire history and fuel management (mainly planned burning) activities are considered. It is reported on an annual basis.

Each Region works towards managing local bushfire risk by identifying planned burns and other fuel management works, which collectively will meet the statewide risk reduction target.

This JFMP aims to meet or exceed district and regional residual risk targets that contribute to the statewide target and to enable the delivery of bushfire management objectives as documented in the BMS. It provides flexibility to account for different seasonal conditions.

**Table 1: Changes to Residual Risk through implementation of the JFMP**

## Strategic Fuel Breaks

Strategic Fuel Breaks can be one of two types:

**Landscape protection breaks (LPB):** Located in the forest to divide the landscape into units/areas suitable to help to reduce the fire to the smallest size possible. These breaks provide a platform for fighting fires in the forest and may also reduce fire impacts on nearby communities.

**Asset protection breaks (APB):** Designed to provide direct protections of communities and assets from the direct impacts of fire. These breaks are generally located adjacent to townships and assets.

Strategic fuel breaks are approved by a separate process and are displayed on the JFMP for information only.

The following strategic fuel breaks are proposed for construction (new) or renewal (upgrading of an existing break to meet current standards) during 2022/23.

# Cultural Burning

Cultural fire is fire deliberately put into the landscape authorised and lead by the Traditional Owners of that Country for a variety of purposes, including ceremony, protection of cultural and natural assets, fuel reduction, regeneration and management of food, fibre and medicines, flora regeneration, fauna habitat protection and healing Country's spirit.

We are guided by the Victorian Traditional Owner Cultural Fire Strategy which provides policy direction and a framework for fire and land management agencies to better enable Traditional Owners to undertake cultural burning for these cultural objectives.

There are six principles underpinning this strategy:

- cultural burning is right fire, right time, right way and for the right (cultural reasons), according to lore;
- burning is a cultural responsibility;
- cultural fire is living knowledge;
- monitoring, evaluation and research support cultural fire objectives and enable adaptive learning;
- Country is managed holistically; and
- cultural fire is healing.

The Strategy was authored by Victorian Traditional Owners with the support of a partnership between the Federation of Victorian Traditional Owner Corporations, DELWP, Parks Victoria and the CFA.

FFMVic and CFA recognises that cultural burning can assist landholders and communities in the use of fire to care for Country. The sharing of knowledge by our local Traditional Owners as well as from indigenous peoples from other parts of Australia will assist in improving our adaptive fire management practices in Victoria. This builds on supporting community through learning about how we live with fire.

Working together to foster knowledge sharing is an important way to enable participation of Aboriginal communities.

Gippsland is actively working together with Traditional Owner groups across the Region, guided by the direction they want to take and specific to the needs and wishes of the group. We continue to build on the strong working relationships that are recognized whilst being open to establishing new ones. Gunaikurnai Land and Waters Aboriginal Corporation (GLaWAC) and Snowy Cann Rivers First People's Country and Waters Aboriginal Corporation have nominated some burns that will be led by Traditional Owners with support from Forest Fire Management Victoria and CFA.

While partnering with GLaWAC we have established the Gunaikurnai Operational Fire Partnerships Management Group, in which an engagement approach between the department and GLaWAC has been endorsed. Through this, for Gunaikurnai Country three types of burns have been identified:

**FFMVic Planned burns:** are FFMVic lead and GLaWAC is invited to support. GLaWAC is engaged as part of the JFMP and values checking process.

**Partnership burns:** meet both FFMVic/ Gunaikurnai interests and objectives. This collaborative approach is led by either FFMVic or GLaWAC, supported by the other.

**Gunaikurnai burns:** are nominated, planned, lead and delivered by Gunaikurnai.

# Approval

The 2022/23 – 2024/25 Joint Fuel Management Program has been approved by:

FFMVic Deputy Chief Fire Officer – Gippsland Region:	Sam Quigley
CFA Deputy Chief Officer – South East Region:	Trevor Owen

Noting for on-ground ignition and delivery of cross tenure and private property burns, FFMVic and CFA agency responsibilities remain unchanged.

## How to become involved in the development of the Joint Fuel Management Program

FFMVic and CFA welcome comment on fire management all year round, on all parts of the planning process – both strategic and operational. Please be aware that due to the planning cycle your comments relating to certain aspects of the program may not be included until the following year’s Joint Fuel Management Program.

Comments and suggestions relating to the JFMP can be sent to:

Regional Fuel Management Coordinator,  
Gippsland, DELWP  
1 Licola Road  
Heyfield 3858

Manager Community Safety,  
Country Fire Authority  
20 Hazelwood Road  
Morwell 3840

**You can find out more about our fuel management programs and subscribe to notifications at [plannedburns.ffm.vic.gov.au](https://plannedburns.ffm.vic.gov.au)**

Planned Burns Victoria (PBV) is an easy-to-use, opt-in system that you can customise to suit your notification needs. PBV provides an overview of all planned burns on this JFMP and allows individuals to sign up to receive notification of when a burn is scheduled and ignited.

# Appendix (1): FFMVic Schedules of Activities

These schedules contain the details of FFMVic-led planned burning activities. Please note that the planned burn year and season identified for each planned burn is indicative only and may be changed due to weather conditions and operational requirements.

The following abbreviations may be used in the following Schedules: ‘\*’ asterisk on burn name denotes a cross tenure burn; PV – Parks Victoria; COM – Committee of Management; DELWP- Department of Environment Land Water and Planning; PP – Private Property; FRB – Fuel Reduction Burn; ECO – Ecological burn; REG – Regeneration Burn; TO – Traditional Owner; FMZ – Fire Management Zone; APZ – Asset Protection Zone; BMZ – Bushfire Moderation Zone; LMZ – Landscape Management Zone; PBEZ – Planned Burn Exclusion Zone; NZ – Not Zoned; FPA – Fire Protected Area.

Latrobe City	D27-20-002	Morwell - Crinigan Bushland Reserve 2	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including Maryvale Private Hospital, adjoining homes, Gippsland Water Facility, Morwell Golf Club, Gippsland Falcons Pavilion.	5	Yes

Latrobe City	D10-15-001	Jeeralang Junction - Jumbuck road	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes and critical community infrastructure including communications tower and domestic water supply.	1.1	No
Latrobe City	D27-20-001	Morwell - Crinigan Bushland Reserve 1	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including Maryvale Private Hospital, adjacent homes, Morwell Golf Club, Gippsland Water Factory, Gippsland Falcons Pavilion.	6.3	Yes

#### CFA Lead District 27 Planned Burns 2024/25

Local Government Area	Burn Number	Burn Name	Burn Type	Land Management Objective	Planned Burn Size (ha)	New Burn
Latrobe City	D27-20-005	Moe - Edward Hunter Reserve 1	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent dwellings and community.	8.6	Yes
Latrobe City	D27-20-006	Moe - Edward Hunter Reserve 2	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent dwellings, School and critical community infrastructure in Moe South.	8.2	Yes
Latrobe City	D27-19-008	Moe - Watsons Road	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	6.5	No
Latrobe City	D27-20-004	Morwell - Crinigan Bushland Reserve 3	FRB	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including Maryvale Private Hospital, adjoining homes, Gippsland Water Facility, Morwell Golf Club and Gippsland Falcons Soccer Stadium.	4	Yes

## SCHEDULE 5: CFA LEAD DISTRICT 27 – NON-BURN FUEL TREATMENTS

### CFA Lead District 27 Non-burn Fuel Treatments 2022/23

Local Government Area	Treatment Number	Treatment Name	Treatment Type	Land Management Objective	Treatment Size (ha)
Latrobe City	D27-22-003	Boolarra – 165 Macintoshes Rd	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.6
Latrobe City	D27-22-004	Boolarra – 26 Todds Rd	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.4
Latrobe City	D27-22-012	Glengarry Nth – 30 Wirilda Crt	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.9
Latrobe City	D27-22-013	Glengarry Nth – 60 Tandarra Drive	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.6
Latrobe City	D27-22-009	Glengarry Nth – 70 Tandarra Drive	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.9
Latrobe City	D27-22-004	Boolarra – 335 Macintoshes Rd	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.2
Latrobe City	D27-22-006	Boolarra – 35 Bunderra Dve	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.4
Latrobe City	D27-22-007	Boolarra – 53 Bunderra Dve	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.2
Latrobe City	D27-22-001	Boolarra – 89 Bunderra Dve	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	1.9
Latrobe City	D27-22-008	Boolarra – 91 Bunderra Dve	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.4
Latrobe City	D27-22-002	Boolarra – 69 Bunderra Dve	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.9

Latrobe City	D27-22-014	Glengarry – Tandarra Estate Access	Pruning	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	8.0
Latrobe City	D27-22-010	Glengarry Nth – 20 Melaleuca Crt	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.8
Latrobe City	D27-22-011	Glengarry Nth – 25 Tandarra Drive	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	1.2

## SCHEDULE 6: CFA LEAD – NON-BURN FUEL TREATMENTS

### CFA Lead District 27 Non-burn Fuel Treatments 2022/23

Local Government Area	Treatment Number	Treatment Name	Treatment Type	Land Management Objective	Treatment Size (ha)
Latrobe City	D27-22-003	Boolarra – 165 Macintoshes Rd	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including adjacent homes.	0.6

#### CFA Lead District 10 Non-burning Fuel Treatments 2022/23

Local Government Area	Treatment Number	Treatment Name	Treatment Type	Land Management Objective	Treatment Size (ha)
Wellington Shire	D10-21-008	Dargo – 129 Lind Ave	Mulching	To provide the highest level of localised protection to human life, property and community assets identified as highly valued including the surrounding Dargo community.	0.2

# Glossary

This glossary provides information on terms contained within the body of this document and the schedules.

**BREA** - Bushfire Risk Engagement Areas.

**Burn Type** – indicates the primary purpose of the burn.

**Burn Number and Name**– the unique identifier for each burn or planned fuel management activity.

**Cross-tenure burn** – a burn that covers both public and private land

**Fire Management Zone (FMZ)** – an area of public land in which fire is managed for specific asset, fuel and ECO objectives. Values included in this column can be APZ - Asset Protection Zone; BMZ – Bushfire Moderation Zone; LMZ - Landscape Management Zone, PBEZ – Planned Burn Exclusion Zone; or, NZ -Not Zoned.

**Forest Fire Management Victoria (FFMVic)** – FFMVic consists of specialist staff from DELWP, Parks Victoria, Melbourne Water and VicForests.

**Land Management Objective** - identifies the desired land management outcome(s) of the burn.

**Lead Agency** - The Lead Agency for a planned burn is determined by the burns distance from public land. Within 1.5 km of public land, planned burning on non-public land falls within DELWP’s legislative scope and DELWP can choose to be the Lead Agency. If it is outside 1.5 km of public land, DELWP is unable to undertake the planned burn; instead, the CFA will be the Lead Agency to undertake that burn.

**Local Government Area (LGA)** – the municipality in which most of the fuel management activity is located.

**Location** – a direction and distance of the planned burn from the nearest major township/locality.

**Planned Burns** - Planned burning is one of FFMVic and CFA’s most important fire prevention activities. It involves the controlled application of fire during periods of lower fire risk, to achieve one of three main purposes: fuel reduction (FRB), ecological (ECO) management and forest regeneration (REG).

It is important to understand that planned burning operations do not stop or eliminate the risk of bushfires. However, Victorian research, and similar information from other parts of Australia and overseas, clearly shows that firefighters have a much better chance of managing bushfires in areas where planned burns have been carried out.

Approved burns in this year’s Plan will require a range of preparation works to make the planned area ready to ignite when the weather and other conditions are right. Preparation works may include, brushing up or grading of existing boundaries and internal tracks, management of hazardous trees, the construction and preparation of boundary and control lines with machinery and pest plant controls. The preparation works will have on-site inspections which will assess the surrounding assets and planned burn objectives.

**Private Property Burn** – burn that occurs wholly on private land.

**Planned Burn Size** – the maximum area of the fuel management activity measured in hectares (ha), including areas specifically excluded from disturbance.

**Residual Risk** - The impacts on life and property that remain after planned burning and bushfires, we call the 'residual risk'. If residual risk is 100 per cent – there has been no fire in the landscape and no fuel reduced and we are at maximum risk where fires will spread and impact. If residual risk is at 70 per cent – the impacts to life and property will be reduced by about a third.

**Strategic Fuelbreak:** A strategic fuelbreak is a strip of land where vegetation has been modified to reduce the amount of fuel available to burn during a bushfire.

**New Burn**– ‘NEW’ = New burn did not appear on last year’s JFMP. *Blank box* = Not a new burn. Burn was approved in the previous JFMP but has not been carried out, it is included in this JFMP and may be conducted at any time.

**Non-Burning Fuel Treatments** – Non-burning fuel treatments such as the maintenance and construction of fire control lines, fire access tracks, fuel breaks, fire infrastructure and other fuel management activities are required to support the planned burning program. Treatments to achieve these works can include slashing, pruning, chemical application (in alignment with safety standards), grazing or other operations (such as ploughing, mulching or rolling) that may be more appropriate or practical in certain areas. For example, fuel on small areas or blocks located within townships may be treated mechanically, where burning is impractical. These methods may also be more suitable in certain vegetation types.
